In **Awareness Through Movement®**(ATM) lessons, the Feldenkrais teacher verbally guides you through a sequence of movements. Some lessons are done sitting in a chair, while most are done lying and sitting on mats and occasionally in standing. Unlike exercise as you know it, these are called lessons because you actually learn how to improve the way you move. The **Feldenkrais Method®** is based on the work of Moshe Feldenkrais, physicist, engineer and black belt in judo. He discovered that by strategically exploring the way one moves, people are not only able to move more efficiently and comfortably, but that the overall quality of their lives improves as well.
